

YPFDJ: A miraculous group

Yes. I have called my fellow YPF DJ friends miraculous. Why shouldn't I. It is a fact that these people work their minds off to make a difference for their country. The best patriotic act any citizen can do. Why am I focusing on this group, out of all the other patriotic people I know? It is because they are the best. That's why. YPF DJ is a very hard working community of young Eritreans that ever came together to make a difference in today's Eritrea and it is making a tremendous difference.

These Eritreans come from all around the world and don't even know each other. But they have this sweet mixing composure that brings them together like the sticky sweet honey that comes from a bee hive. Even though it is just a sweet mixture, it is a very important thing. It is a powerful voice that brings people together and cannot be seen or be thoroughly defined. God has blessed us Eritreans by giving us a powerful gift of patriotism. We do not even need to know each other in order to come together to work for Eritrea. We see this in each Eritrean's heart; we are all on the same page, which is to do the best we can for our beloved country. We are always eager to help our country for she is everything to us. We know that our life has been set upon by God to make a difference in the world but also our country.

If I was ever asked to define YPF DJ, I wouldn't want to pass by only saying Young People's Front for Democracy and Justice. But I would even go more with this beautiful young organization giving far more detail. YPF DJ fights for democracy and justice with a strong bond and love of the country. It has a gift of using its young and fresh voices for the good of its country. Not just its voices, but also the personal strengths of its members combined with that of others in order to create an even stronger voice, literally and in action. That is what YPF DJ is. But a definition to me isn't only the dictionary definition. It has way more meaning than just a plain old definition.

Especially when it comes to my fellow YPF DJ members, but my interest and attempt to focus on this group and trying to define it was when I saw some clips of the latest YPF DJ conference in Sweden. I saw pictures of tremendous and enthusiastic youth that is ready to work for Eritrea. I saw passionate human beings in that conference; in my opinion the room too was blown away by their enthusiasm.

This conference was only for a few days, but it looked like they had a year of enjoyment. It was an amazingly energetic group and was far beyond my wildest expectations. The Eritrean youth in that conference were seemed to have created a fluent beautiful Eritrean patriotic feeling. Here were Eritrean youth expressing their commitment to serve the cause of Eritrea. I couldn't have asked for a better conference than this. Especially when people doubted that YPFDJ and were trying to give it all sort of negative image. Even though they were all lies, it was designed to push this great group down. But true to the Eritrean character they proved all the

ill-wishers wrong and YPFDJ is here to stay. It will magnify and develop its people's glory by serving at the fore front. After all YPFDJ is a People's Front and it will never give its back to its people. Let it be known this People's Front is not going to retreat anytime but it will grow and thrive. It is this character of Eritrean youth that made me to focus on the YPFDJ.

YPFDJ is like the super hero full of young people that are over shadowed by unpleasant lies. But true and kind hearted people know that YPFDJ is out there making a difference.

Long live Eritrea.
Long live its committed youth.
More power to the YPFDJ, the leaders of Eritrea's future.
