## **1. Introduction**

There are here and there movements known as opposition groups and they are becoming a real menace to the Eritrean citizens and they are highly opposed to the government of Eritrea. These groups have been collaborating with the Woyane of Tigray (the current rulers of Ethiopia) for many years; and now they have been using the war of disinformation since 2004 with a mission to wage civil unrest leading to a civil war among the Eritrean citizens.

When you carefully observe their voices and actions of these oppositions, one can quickly learn that their teachings are not coming from their own country's experiences but coming from the USA and European countries to make them political stooges to act for terror attack to all the citizens so that everyone can live in fear. Their approach has been filled with rampant and outrageous lying – as their invented strategy which is obviously the only hope they have, to provoke a **civil war** in Eritrea. They are following the Obama indoctrination (progressive's) script to be fulfilled.

*“Furthermore, it is undoubtedly true that the centralization of all the developmental programs such as: the challenging programs “**nation building**” and the fair distribution of the state **benefits** to its citizens as well as **Military** protection from any enemy confrontations are indeed in the hands of one organization that is the EPLF/PFDJ. This is morally, politically and legally correct if we are going to even have a country of our own.” Then what are the right things to do?*

It is our historical reality that every true Eritrean remembers: we paid heavy prices to reach to the level of legitimacy to become full fledged nation and it is going to stay the way the EPLF/PFDJ handling the situation until the government found refuted the **use** of force is no more necessary to eliminate any outside influence in the form of political insurgents, terrorists or jihadists threat to our nation.

The oppositions are becoming the players in the game and adopting the guidance of a different set of none ethical and very anti social beliefs. Therefore, for the sake of simplicity, I will call them **justice seekers**: but again who are they? Are they truly Justice Seekers or anti social deviant seekers? I don't know but for the sake of this article, I am assuming they are following Social **Justice**. Political **Ideologue** or simply confused groups.

The majority of their followers of these evil plots may not know what the end result would be. Sure enough it could only lead to disaster, death, and overall infested with sick anti social behaviors, at least the artistries who are their advisors leading from behind they must have known it very well. But, according to the latest educated guesses: the Eritrean masses have built a momentum of awareness and begin to discuss among themselves these immorality, and anti cultural, 21<sup>st</sup>, century phenomenon. Once it has **all blown over** about the secrecy and cultural reality of this ideology as explained by Mr. Victor Davis Hanson, saying that: “[The progressive movement](#) requires both deceit and euphemism to mask its apparently unpopular agenda”. Therefore, this sick ideology will be facing its rejection by all Eritrean citizens and by the majority of the diasporic Eritrean nationals due to its Pro-LGBTQ Transgender lifestyles.

## **2. The method of the process followed by these enemies are:**

The people at the top who are exploiting the situation whether real or imaginary through **mass hysteria** falling inexplicably into the following: Moving to the sides of the notorious “regime-change” activists Ms. Sheila Keetharuth, illegally appointed by U.N. Human Rights Commission of Inquiry (COI) and Ms. Mirien v. Reisen (European External Policy Advisor), NGOs, Amnesty International (AI), in promoting all the hypocrisy against Eritrea which is a detriment to the country's economic, political and cultural values.

All these enemies have one thing in common but in reality they are the **Eritrean informants** who feeds them with lies and distorted visions of Eritrea. For example: the direct and indirect dishonest working agenda of Bereket Keshi Habteselassie was always wishing to call Eritrea as a

failed nation by any means necessary which closely mirrors the title of his book which was printed on December 6-2010 “Wounded Nation”. This man and others like him have been working closely with some websites news media, set the political agenda and shaped the type of protest to be carried out such as blackmailing and accusing the Eritrean Government its overall administration has been labeled by these groups that: The government is nothing more than commuting executions, beatings, sexual assaults on both females and males since 1991 which leads to **ruling by fear** as they claimed.

Then, the confused followers Diaspora go through emotional expressions and react negatively including violence for the destruction, to every situational influence. They chose street protests that will create a horrific view of Eritrea, in particular the demonization of the president by shouting with loud voices as a **rallying cry** “down, down Isias”, By doing so, I think they were hoping to get feeling of pity from the whole world for their cause.

The following are the most violent **crimes** they want to carry out against the people of Eritrean:

1. They simply wants to eliminate the president by any means if they ever can. They have been given the wrong advice originated from foreigners sworn enemies of Eritrea, as well as the Woyanes and their Eritrean collaborators; who are wishing the elimination of the president and the disappearance of Eritrea from the face of the earth once for all. That being said, then the next question is how? This is how: "When you take the head off a snake, the whole body will fall". What a wish? Again these efforts have been marred by illegal, criminal intent of their practices and are exposed and doomed to failure again and again.
2. All the opposition groups in the Diaspora are continuously plotting evil intent against any economic, moral and legal progress made by the government. They are imagining that by acting this way again they thought they are shocking the world with their voices on the streets, destroying or burning Eritrean community buildings, harassing and beating Eritrean embassies personnel wherever they could find them and intimidate Eritrean youth with threats of murder. By following these progressive evil scripts they erroneously think they have gained the people’s confidence and acceptance while instead they are engaging in criminal activities which the Eritrean public will never accept. Then, on the other hand when we see them committing crime after crime, we feel sorry for them because they are Eritrean nationals. that are doomed to failure because of their progressive policies.
3. These enemies are colluding with foreigners (none Eritreans) through a secret understanding to act with evil or harmful intent to the nation of Eritrea. They are constantly trying to delegitimize the government by:
  - (a) demonizing the masses who happened to be government supporters by attacking each individual’s or groups’ morality with their stupid (offensive slang to imply that all government supporters are “brain dead”),

(b) ignoring any normative relating to rules of behaviors **legal consequences that will follow**. The continues attempt of assaulting or demonizing the Eritrean culture by introducing anti social behavior life styles, they should have known better, they are illegally betraying our [National Charter](#) which stated:

*"A National Charter for Eritrea" is not copied from books or from the charters of other countries. It starts from the **realities of our country and society, and from our rich experience**. It does not borrow wholesale any analyses or formulas that are fashionable in today's world either. Rather, by critically examining all ideas and relating them with the realities of our society and our experience, the purpose is to chart an independent line that works:"*

Those individuals or groups who are impacting our culture which is the root of our values and beliefs that also define us as a society of Eritrea, we will not allow [any force for progressive change](#) and they are making great mistakes. Our message is simple: Don't dare to over smart us with words which are detrimental to our Moral, Legal and Cultural (MLC) rights with [any improper factors](#) anti Eritrean social behavior life styles. We all can see and feel clearly that the Eritrean citizens are now joined in great national efforts to rebuild our country and restore our promises to the support of the EPLF/PFDJ governing rights.

*"By the way we understand that the EPLF/PFDJ makes mistakes but we also believe whole heartily that leadership, which have been idealistically based leaderships and is constantly evolving to benefit the Eritrean Society based on their own experience and including our (meaning those living in the Diaspora) supportive understandable and actionable" **advice** happening time by time reality"*

### **3. An Assault on the Eritrean Pro- Family Cultural Values.**

The opposition groups are attempting to introduce a construed constitution that allows a detrimental anti Eritrean social behaviors and life styles to our people. The following tools and techniques have been used against the citizens residing in the nation of Eritrea. Which will result in no success at all. The below listed are the main highlights:

#### 3.1 Methods and techniques used:

##### 3.1.1 Legally

1. The enemies try to prove that Eritrea's creation was not justified when Bereket Keshi Habteselassie known with his (fake pen name Hailemichael) advocates that: "in a sense he said: "we" means (Eritreans and Ethiopians) are all Ethiopians and we are the same and before he died his wish is to see [both countries will come back together](#)". Wow I have never heard such a **strong wish** like this irrational person to be ...before his death. Who asked you that we would want to come back together without our legal rights, interests, and benefits

fully protected?

2. It even became clear after his interview with an amateur news man named: Tewodros Tsegaye. The question asked by the news man to Bereket was: Prior to the occupation of Eritrea by Italy, was Eritrea existed as a country? he continued another question in line with the first one: Wasn't the Italians took away that land (meaning Eritrean land) from Ethiopian administrative division?. His answer was: **yes** it was Ethiopian division and am- am- am "It is debatable (AKARAKARI- GUDAY NOW). [Interview of Dr. Bereket by Tewodros Tsegaye.](#)
3. First of all the answer should have been; **No**, without going further the early history of Aksum, in Tigray was the history of [both Eritrea and Tigray](#). The founders of Aksum came crossing from Saba in Arabia, make their way through the coastal plain of Eritrea before reaching the highlands in the 3rd and 4th century AD. This Kingdom was based upon trade across the Red Sea. The capital of Axum was in the highlands of Tigray (now a province in Ethiopia), and the main port was at Adulis which is now called Zula in Eritrea
4. After the expansion of the Persian empire in the 6<sup>th</sup> century led to the rise of Islam religion and "in 710 AD. they destroyed Adulis and the ancient kingdom of Axum resulted in declined until it was reduced to a small Christian Enclave. The region settled into being a remote, isolated community only re-emerging by the early 16th century as Abyssinia" (Read: [History of Eritrea](#))
5. The claims that Eritrea had been an integral part of Ethiopia is false. The truth is Menelik and the Tigray Rases were always cared about how to hold power to themselves and none what so ever about independence in particular about the safety of Eritrea. Especially Menelik's collaboration with the colonizers was about how to get the armaments he needs for the expansion of his little kingdom Showa. For example first Emperor Yohannes signed the treaty of Hewitt for the western Eritrea and all the areas near Massawa to Anglo-Egyptian power then, Emperor Menelik signed the treaty of Wuchalie (a) with the Italians that give away the entire Eritrean land and in effect recognizing Eritrea as a full fledged Italian colony. The Italians had full ownership of the land not as a lease rental as claimed by some Ethiopian academicians; who never been able to provide a lease agreement contract as a proof that the Italians will only stay for a temporary moment of time. (b) Why would Italy spent the equivalent to (one billion Dollars today) and to have developed the whole Eritrea and the bulk amount of money that was spent on creating a capital city that resembles one of the finest Italian cities called Asmara. Why would they spent that amount of time, money and effort if this was for the so called temporary lease as the Ethiopians claim.
6. I think this chap like the rest of Ethiopians and Tigreans must learn the factual facts of history before he ask the question: Wasn't the Italians took away the (Eritrean) land from the Ethiopian administrative division? First of all the kings and Rases were a hell bent

collaborators for self gain only not to be considered defenders of Freedom fighters.

7. After the Aksumite empire, the area from the Eritrean highlands to the Red Sea was known as the land between the Red Sea and the Mereb river). was later renamed as the domain of the ***Bahr Negash*** ("Ruler of the sea"). The *Bahri Negus* (also called the *Bahri Negasi* or *Bahr Negash*) and lasted from the 15th century to the Ethiopian takeover in 1879. (Please read: [Medri Bahri](#))
8. Here needs to be understood carefully that there isn't a single major battle that the Ethiopians/Tigreans won without the heavy participation of Eritreans. For example the battle of Gundit against the Sudanese as well as the battle of Gura against the Egyptians in 1875. From that victory, Yohannes' General, Ras Alula became Governor of the province of Hamasien, Seraie and Akeleguzai only. Then, it was immediately short lived interrupted by the Italian Government and took over the land in 1882. Would you admit that Ethiopia was colonized by Italy for 5 years when in reality the Italians couldn't rule and control Ethiopia due to the freedom fighters surprise attacks or hit and run tactics against them. Therefore, the 5 years of Italian occupation was attributed only to the chaos of war which resulted in interruptions of key Italian ruling or business activities. Then, in the case of Eritrea since Alula could only temporarily obtain a small portion of Eritrea and realized he could never bring under control the rest of Eritrea then he left in retreat the whole territory of Eritrea to the Italians.

### 3.1.2 Morally

The Newspaper Guardian view on Eritrea, Aug 19, 2015 and other social medias, have accused the Eritrean president as acting like "cruel and tyrant motives to weaken in the most despicable ways, to show that Eritrea is transforming the youth into casting to darkness instead to be enlightened with hope and bright future". Read: [the Guardian view](#)

Here is a typical example about why I said that the teachings of the oppositions groups are not coming from their own country's experiences but from foreigners. When you hear them talk it all designed to mislead the youth in the wrong direction to hate their own country per the Guardian Newspaper. No wonder we hear them day and night calling Eritrea and the PFDJ a nation of **Shiftas** !!

## 4. The Lack of Standing for Legality, Morality and Nationalism as Dr. Bereket Practices:

If you don't stand for something like (nationalism, legality and morality) you will fall for anything including any pro gay progressive ideology such as transgender life styles. We must apply a high legal standard that will produce morality that will give us a high level of tranquility and peace that will only be obtained through the mandate of legality that produces a true sense of

nationalism.

Any contractual agreement must contain Eritrean full legal right within the agreement such as everything must be pre disclosed that has good intention for the people and doesn't legally detrimentally affect the social cultural values of Eritrea. Lastly, it must fully benefit the people of Eritrea. These are what Eritreans have been lacking and we can clearly see how Bereket failed the national Eritrean society since we don't have the broad legal education and these standards in place.

Bereket Keshi Habtesellassie is highly against my nationalism and morality, and my way of publicly exposing the benefits to the Eritrean people based on legal rights which is the context of my articles that I always offer to the people. Now after he become exposed by me many times, he attacked the content of my last article and he commented under a pen name "Halemichel", to hide his identity as usual, he became who he is exactly the type of a person who doesn't stands for the protections and benefits of the Eritrean citizens at all. Since he vigorously disagree with my articles that I presented, I was able to jump and read what he wrote on his Wikipedia page which resembles a confession by someone when the last day came he exhibits a gasping voice coming out from each sentence in his writing. Read: [Bereket Wikipedia](#)

Now, to late but at least he admitted that he will only fall for that Progressive Activist of Human Rights; that means he is a pro gay transgender life styles. Bereket Keshi-Habtesellassie's constitution of the 1997, the English version as he claimed that he authored is quite detrimental to the Eritrean society because it is highly construed with bad intentions. That is the reason why the legal interpretation will lead anyone who reads it carefully will come to a conclusion that many of the articles are construed in accord with the government's intent to fail. These were the key reasons why the president couldn't signed off to protect the Eritrean people.

Read: [Eritrea's journey From a National Charter to the Planned 2018 First National Constitution of Eritrea by legal Means](#)

But as far as he is concerned, he has a history of offering the wrong alternative that is why he will always be rejected.

For example: prior to the failed 1997 constitution he offered a peace agreement between EPLF and ELF both sides rejected him because, they couldn't see any benefit in the unprofessionally prepared and executed dialog between the two rivals. The discussion collapsed because he never presented an effective agreement that could protect and legally benefit both rivals that could be perceived as a **win-win situation**. He has a long history of achieving a failing agreement to resolve the deep social legal issues of our nation. No wonder the constitution that he claimed he authored was written from the perspective of potential progressive values as opposed to the Eritrean national charter that represents our social values or he collaborated with the enemies of

Eritrea who were using the legal system to delegitimizing everything for the destruction of Eritrea. He designed it with the progressive ideology that is built into it to become a sick document which came from abroad that has nothing to do with our cultural and moral values. His personality is highly tainted or polluted.

Recently, in his Wikipedia he claimed that he is a “Progressive Activist” but his record shows that he never disclosed upfront his activism, before he even started to work on the 1997 proposed constitution. This is an evidence that he was biased before he messed up the constitution of 1997. Then, still he is fighting the Eritrean Government through a surrogate lady by the name Ms. Sheila Keetharuth,

Then, he had an obligation to disclose, had he been an actual competent Board Certified lawyer (license) he would have known that he has an obligation to disclose that he is a “Human Rights Activist” and since he obtained the position of authoring the 1997 constitution fraudulently, then, the Government of Eritrea clearly has a case against him. He obtained that position authority through a false pretense. His moral beliefs and the negative impact it would have caused on the citizen’s of Eritrea which are: the moral, legal and nationalistic beliefs are severely hindered the movement of progress. But since he didn’t disclose his true intention then in this regard he attempted to engage in constitution making effort that is he fraudulently acting as a qualified licensed Attorney who follows all the required ethics. This tells the people of Eritrea loud and clear that he never had any good intention for the Nation of Eritrea in the first place. He alleged he drafted a constitution that doesn’t protect the nationalistic beliefs and interest of the people but instead he replaced it with a sick constitution to the Eritrean citizens that allows “any religion or any improper factors” as deviant rights to the people of Eritrea a gift from Bereket the designer of Bill of Rights to all Eritreans. Wow, what an intelligent professor a product of Ethiopia (With his colorful **sash** of Ethiopian flag on his right shoulder at General Wingate high school graduated to veered scholarship in London).

He is legally liable for crime against the nation of Eritrea for delivering social detrimental pro-LGBTQ/Transgender base constitution.

Here is an example of his limited mental ability and education deficiency that he can’t be able to evaluate and make assertions about Aerospace Engineering knowledge. Let me help him to explain what an Aerospace Engineer is? Aerospace engineer like me is: one who is qualified to deal with the design, development, testing and manufacturing of aircraft, spacecraft and missiles, who also has the academic knowledge in aerodynamic characteristics of control surfaces, lift, drag and other properties influenced by aerodynamic forces. as well as avionics. Additionally, I am an FAA. licensed person who is authorized for airworthy release any work done on an aircrafts during inspection, repair and modifications. But, it is not meant to be equal to a code for a flight attendant. Here is where his stupidity kicked in and got exposed.

Now, based on his unpolished and erratic behavior as some people beliefs about his personality, he is incompetent before he even start working on the Eritrean constitution. We can confidently say that he never had the qualification to write the constitution in the first place, due to the fact that he never pass the **bar** examination to become licensed to practice law that all law attorneys must go through and posses. That is why he is qualified to be a **mercenary to make money at the expense of honesty, ethics, and morality**

Another example of his bad intention for the Nation of Eritrea is reflected in his book titled the “Wounded Nation...”, “ December 6. 2010. This was part of the overall destruction of Eritrea that he intend all along that is reflected in his book. Why did he call himself a Distinguished Professor of Law at the University of North Carolina at Chapel Hill. He only taught few months as law lecturer and then he was placed as a Professor of African Studies. A question to be answered next time.
