The Family is struggling and hurting. Genet, the mother of the child is still in the hospital while we are preparing to bury her daughter little angel Galila Rezene Habtegergish. This family will likely have more difficulty adjusting to the loss of their beloved daughter and will have financial difficulties as well. They are privately sponsored, and the entire support system depends on the sponsor. Our communities support will be required for a long time to come. As for now let's support them generously.
