

The Sick Minded Eritrean Opposition Groups Are Still at it.

By Yemane Tsegay

May 31, 2020

On May 15, 2020, the opposition group who are the enemies of the Eritrean masses and the Eritrean Government have recently sent a progressive request to the UN Human Rights Council, Geneva. They are appealing to extend the mandate of the Special Rapporteur Ms Sheila Keetharuth to come back again to fraudulently abuse the Government of Eritrea on false allegations of Human Rights violations. The Opposition groups are requesting that this known criminally inclined individual who has demonstrated her complete willingness to persecute the government of Eritrea instead of giving them her professional none bias opinion in regards to human rights. Therefore, the opposition groups by knowingly engaging and requesting for Sheila they themselves are engaging in criminal infringement against the government and the Eritrean masses.

The opposition group who are the enemies of the Eritrean masses and the Eritrean Government have made many unbelievable **attempts** to convert Eritrean youths (via online media) in the Diaspora to be on the wrong side of history like them, but instead they have failed miserably. Many Eritrean youths in the Diaspora who are the natural defenders of their homeland have been openly accusing the opposition groups through a variety of social media - and some even confronting them with physical actions on a daily bases.

The oppositions who are continuing the Obama's Administration's policy toward Eritrea. Of continuously attacking the Eritrean Government. The aim of these tactics were to cause disunification of the Eritrean masses as well as causing disharmony of all the nine Eritrean tribes. This will to keep the Eritrean government from achieving a full blown developmental plans. The goal of the opposition groups who always have sick intention to divide the Eritrean people through regional sections and by religious beliefs in order to bring fear and inner strife among the Eritrean masses, but all these wishes resulted in total failures and their dreams shattered again and again.

Eritrean's detractors have realized a fundamental truth – when we (the masses) sense mortal danger we unite, we mobilize and we come out fighting hard and we fight only to win. We have demonstrated this courageous behaviors under any conditions including war conditions. We gain willingness to sacrifice with our resilience over the morally bankrupted opposition groups. In a

paradoxical and unexpected way, attacking Eritrean masses means just serves only to strengthen us, unlike your expectation from the Woyane military might.

Any Woyane military forces who were to be believed by the oppositions to have the capacity for arming, training and deploying large conventional armies are not available now. Don't expect big hope from the Woyane of Tigray to attack Eritrea with jets and tanks anytime soon – they will be basically destroyed in no time by the Eritrean military and Ethiopian federal military powers. The Woyane's abilities to fight with Eritrea is at its lowest capability not even with their charade talk of conventional war. **Game Over, Adiós.**

Happy Independence for every Nationalistic Eritrean!
